

The background of the entire page is a night-time photograph of the Liverpool city skyline. The buildings are illuminated with blue and white lights. A prominent feature is the Albert Dock building with its clock tower. Overlaid on this image is a network of white lines connecting various points, representing a digital or fiber network. A large, bright blue lightning bolt strikes down from the top left corner, its energy spreading across the sky. In the top right corner, the 'digitel' logo is displayed in white, with the tagline 'Voice • Data • Broadband' in a smaller, blue font below it.

## Transforming the Liverpool City Region into a Gigabit City Region

Lightning strikes at 75 miles per second, our Ethernet  
fibre broadband strikes at 124,000 miles per second

# Liverpool City Region – Digital Connectivity Leader

**Digitel is delighted to partner with LCR Connect transforming the digital infrastructure of Liverpool City Region.**

For the past 20 years the U.K.'s national broadband network has suffered from a serious lack of investment. Hundreds of thousands of small to medium businesses in the Liverpool City Region (LCR) and throughout the UK have been left in the broadband slow lane with outdated plain old ADSL broadband services.

Thankfully this is all about to change as the Liverpool City Region Combined Authority's 212 kilometre Digital transformation full fibre broadband network is now being rolled out throughout the LCR area. The £30 million joint venture investment will deliver a boost of over £1 billion to the LCR economy.

The faster than lightning gigabit full fibre network will position the Liverpool City Region as the UK's first Gigabit City Region and a hyper-connected digital leader in the UK, connecting businesses, schools, hospitals, universities, hotels, residents and the LCR regions six local authorities to the new affordable fibre broadband network.

**The installation of the full fibre network is just the first part of the Liverpool city region's Digital transformation.**

The LCR CONNECT joint venture will ensure that the Liverpool City Region continues to lead the way in a host of growing business sectors including health and life science, artificial intelligence and advanced manufacturing, driving vital business growth and investment into the LCR economy.

The best part is that Liverpool City Region residents and businesses own 50% of the network via LCR CONNECT, so it's a great time to change from your existing supplier and and switch to your own advanced gigabit network!

There's never been a better time to switch to your own faster-than-lightning Broadband Network!

# Our Fibre Business Broadband just keeps getting Bigger, Better, Faster

You won't find a better business class broadband service anywhere else

## We Provide:

- ✓ The best business class broadband service available in the UK
- ✓ Comprehensive security protection for your whole network
- ✓ Software Defined Network (SDN) delivers a 24/7 provisioning, management and monitoring service 365 days per year
- ✓ Automated fault detection and correction 24/7 including Broadband, Router, Data Switch and Wi-Fi
- ✓ On-site installation and training by our own qualified engineers
- ✓ Secure VPN access for remote sites and home workers/remote workers
- ✓ Proactive AI analysis of network problems and network efficiency optimisation
- ✓ Maintenance support for all the products we supply to our customers

### Customer Support

Our business class broadband service delivers 24/7 SDN cloud monitoring and management support for our Broadband, Router, Data Switch and Wi-Fi Access points providing fast, responsive service support that lowers your IT costs.

### Powerful AI Driven Security

With today's Internet security threats businesses need highly secure VPNs and powerful Firewall protection. Digital's business class router delivers URL/IP/MAC filtering, Access Control and Advanced WPA 3 Encryption, helping to protect your business against cyber security threats like malware, viruses, DDOS, trojans, and hackers.

### Business Static IP Address

Digital includes a static IP address for your business router, providing enhanced security for any VPN access by homeworkers and remote workers. This is all monitored by Digital's INet SDN cloud management network, further protecting your business against Internet threats and helping to keep your business secure.

### Faster Evolving Speeds

Digital's business broadband service provides you with fibre broadband speeds from 40 Mbps to 10,000 Mbps to meet your business requirements, including a gigabit business class router and gigabit Wi-Fi speeds.

### Built-in Phone Capacity

All our business broadband packages support both incoming and outgoing IP voice telephone calls, because your broadband service must manage both your voice and data traffic. We provide a business router that delivers QoS (Quality of Service) to ensure all critical services are allocated the appropriate amount of bandwidth to meet all your business requirements.

### Guaranteed Responsive Service

Digital's best in class broadband service includes on-site installation by our own engineers. We do not mail out a router for you to install yourself or use subcontractors. If you have a problem with your router or broadband, we attend your site to determine the problem and if necessary replace the router free of charge, resulting in fast, responsive support.

# Advanced Business Class Systems Deliver Gigabit Speeds Whilst Monitoring your Broadband and Network

Gigabit VPN Router

1x Gigabit SFP WAN Port    1x Gigabit WAN Port    2x Gigabit WAN/LAN Port    2x Gigabit LAN Port    Reset

- Integrated into INet SDN: Zero-Touch Provisioning (ZTP), Centralised Cloud Management, and Intelligent Monitoring.
- Centralised Management: Cloud access and INet app for ultra-convenience and easy management.
- Gigabit Ports: 1 gigabit SFP and 5 gigabit RJ45 ports provide high-speed wired connectivity.
- Up to 4 WAN Ports: 1 gigabit SFP WAN port, 1 gigabit RJ45 WAN port, 2 gigabit WAN/LAN ports optimise bandwidth usage.
- Highly Secure VPN: Supports up to 100x LAN-to-LAN IPsec, 50x OpenVPN, 50x L2TP, and 50x PPTP VPN connections.
- Advanced Security Features: Advanced firewall policies, Multi-factor Authentication, DoS defence, IP/MAC/URL filtering, and more security functions to protect both your network and data.

## Full range of Gigabit Smart Switches

- Gigabit Ports: Gigabit RJ45 Ports and Gigabit SFP Fibre Slots provide high-speed connections.
- Integrated into INet SDN: Zero-Touch Provisioning (ZTP), Centralised Cloud Management, and Intelligent Monitoring.
- Centralised Management: Cloud access and INet app for ultra-convenience and easy management.
- Static Routing: Helps route internal traffic for more efficient use of network resources.
- Robust Security Strategies: IP-MAC-Port Binding, ACL, Port Security, DoS Defend, Storm control, DHCP Snooping, 802.1X, Radius Authentication and more.
- Optimize Voice and Video Applications: L2/L3/L4 QoS and IGMP snooping.
- Standalone Management: Web, CLI (Telnet, SSH), SNMP, RMON, and Dual Image deliver powerful management capabilities.

## Wireless MU-MIMO Gigabit Access Points

- Fast Dual-Band Wi-Fi: Simultaneous 450Mbps on 2.4GHz and 867Mbps on 5GHz totals 1317Mbps Wi-Fi speeds as standard, and speeds up to 3550Mbps are available.
- Seamless Roaming: Video streams and voice calls are unaffected as users move between locations.
- Cloud Centralised Management: Accessed via our INet app for ultra-convenience and easy management.
- PoE Support: Supports Power over Ethernet (802.3at) for convenient and affordable installation.
- Secure Guest Network: Guest network provides multiple multi-factor authentication options with advanced wireless security technologies.
- Advanced Wireless Tech: Optimise network performance with MU-MIMO, Band Steering, Airtime Fairness and Beamforming technologies.
- Integrated into INet SDN: Zero-Touch Provisioning (ZTP), Centralised Cloud Management and Intelligent Monitoring.

# Digitel's INet Intelligent SDN Platform Provides Protection for the Whole Network

Digitel's INET Intelligent Software Defined Networking (SDN) platform integrates your network devices, including access points, switches and gateways, providing 100% centralised cloud network management and 24/7 monitoring. INet SDN delivers highly scalable network management without the added investment. With INet SDN, you are guaranteed more functionality at a lower cost, including seamless wired and wireless connection management for small, medium and large enterprises.

## Increase Network Operating Efficiency

Increase operating efficiency with INET Centralised Cloud Management, intelligent network monitoring, analysis, including advanced AI technology for stronger performance and higher network efficiency

## Comprehensive Security Protection

Improve security protection with advanced network security that protects your LAN/WAN and VPN network access including high-level data encryption

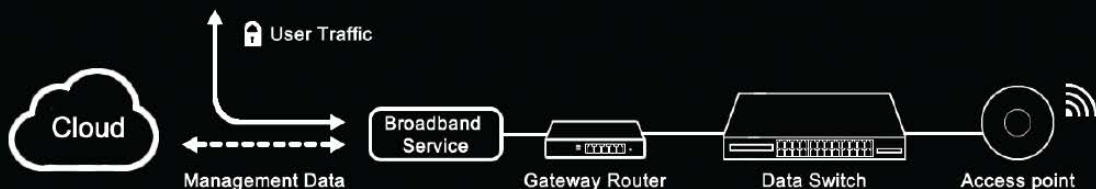

## Increase Reliability

Increase reliability with 24/7 fault detection and network performance monitoring including traffic distribution, network optimisation and 99.99% reliability

## Increase Cyber Security Protection

With the rapid increase in cyber security threats over broadband services it is critical that businesses upgrade their security protection across the whole network. In 2020, 88% of UK businesses suffered security attacks, 43% had cyber security breaches and 48% were hit with ransomware with an average recovery cost of £16,100 for each data breach.

## Comprehensive Security Features

Powerful firewall and advanced security features further protect the network ensuring the security of both your voice and data communications.

Highly Secure VPN

Powerful Firewall

URL/IP/MAC Filtering

Access Control

Advanced WPA3 Encryption

Captive Portal

Our dashboard tracks your real-time network status, checks network usage and distribution, receives network condition logs, abnormal event warnings and notifications; it also tracks key data for better business results. Network topology helps us to quickly see and troubleshoot all network connections.

# Temovi - Discover the Power of Digital Transformation

**Experience the power and impact that digital transformation will have on your business, it will quite simply revolutionise the way you do business**

Most phone systems installed in business today use 50-year-old technology. Can you imagine using a 50-year-old mobile phone? The very thought is laughable! In today's business environment you need more than just a plain old phone system to run your business, you need smart technologies that digitally optimise your business taking it to the next level. Temovi Cloud multimedia network puts the future in reach with constantly evolving cloud services and the latest unified communication tools, layering innovations on top of the services your teams use every day.

The way we communicate is changing; businesses now need to communicate not only by voice, but with text messaging, social media, webchat, Whatsapp and LinkedIn to name a few. Temovi empowers your business with omni-channel communications, so regardless of what your customer's preferred communications choices may be, Temovi allows you to communicate via their channels of choice, making it easier for them to communicate with your business.

## What's Included

### Business Voice Essentials Licence Includes:

- ✓ Business Line
- ✓ Digital LCD multi-line Display Phone
- ✓ 2 Gb ethernet connections
- ✓ Noise Cancellation
- ✓ Headset Connection
- ✓ Desk or wall mountable
- ✓ 500 local and national minutes
- ✓ 500 UK mobile minutes
- ✓ Non-blocking Technology
- ✓ Voicemail
- ✓ Voicemail to email
- ✓ Maintenance Included

### Business Voice Pro + Mobile includes:

- ✓ Business Line
- ✓ Digital LCD multi-line Display Phone
- ✓ 2 Gb ethernet connections
- ✓ Noise Cancellation
- ✓ Headset Connection
- ✓ Desk or wall mountable
- ✓ 2,000 local and national minutes
- ✓ 2,000 UK mobile minutes
- ✓ Non-blocking Technology
- ✓ Voicemail
- ✓ Voicemail to email
- ✓ Mobile App including PC/laptop/notepad
- ✓ Compatible with Apple iOS, Android, Microsoft
- ✓ Multi-party video conferencing and collaboration
- ✓ Maintenance Included

**All for less than the cost of a BT analogue landline!**
